

Hi Prashant Ji,

First of all Thanks a lot for your effort and invest your time to configure "eduroam" at IIT Gandhinagar. We appreciate it.

We checked the log at our end and figure it out your servers is working fine because we received the authentication request from your server. for security purpose, we had disabled radtest authentication in our primary radius server. Otherwise, it is working without any issue.

I once again would like to thank you for taking out your invaluable time and helping us with the setup.

Thanks & Regards,
Rohit Chaudhary
